Data Collection

Sources

- **Databases** - SQL (MySQL, PostgreSQL etc.), NoSQL databases (MongoDB etc.)
- **Public Datasets** - Kaggle, UCI ML Repo etc.
- **APIs** - Twitter API, Stock API, Weather API etc.
- **Web Scraping** - HTML pages, blogs/articles, social media pages etc.
- **Sensors & Devices** - IoT devices, health wearables etc.
- **Surveys & Forms** - customer satisfaction, feedback etc.
- **System Generated** - logs, video feeds, synthetic data etc.

Data Science

Steps Involved

1. Define the Problem
2. Data Collection
3. EDA
4. Data Cleaning & Pre-processing
5. Feature Engineering
6. Modeling
7. Evaluation
8. Deployment
